

SOLAR PANEL BIRD PROTECTION DUBAI

Stop Pigeons Destroying Your Solar Investment —
Permanent Fix

SOLAR PROTECTION

www.birdcontroldubai.com

Why

1

Warm Sheltered Gap

The space under solar panels is perfectly sheltered from Dubai's intense sun and predators.

2

Elevated & Safe

Height keeps pigeons away from ground-level threats — ideal for nesting year-round.

3

Year-Round Breeding

Dubai's climate means pigeons nest under panels in every season, all 12 months.

4

Close to Food Sources

Residential rooftops are close to gardens, waste bins, and outdoor dining areas.

Dam

1

35% Efficiency Drop

Droppings on panel surfaces block sunlight, reducing power output by up to 35%.

2

Serious Fire Risk

Dry nesting materials (straw, feathers) near electrical wiring create real fire hazards.

3

Micro-Cracks

Pigeon footfall and weight on panels causes micro-cracks in photovoltaic cells.

4

Warranty Voided

Bird damage voids manufacturer warranties on many solar panel brands in the UAE.

The

1

UV-Resistant Steel Mesh

Galvanised or stainless steel wire mesh clips around the entire perimeter of your array.

2

Ventilation Maintained

Mesh seals the gap without blocking airflow — panel temperatures remain unaffected.

3

No Drilling Into Panels

Specialist clips attach to the panel frame only — completely warranty-safe method.

4

One-Day Installation

Most residential rooftop arrays are fully protected in a single day by our team.

Solar Panel Protection — Key Facts

35%

Power Loss

Pigeon droppings reduce solar panel electricity output by up to 35%

AED 600

Start Price

Residential solar array bird proofing starts from just AED 600

10yr+

Protection

Quality mesh systems protect your solar panels for over a decade

Solar

1

Small System (6–10 panels)

AED 400–700. Full perimeter mesh installation. Completed in one day.

2

Medium System (10–20 panels)

AED 700–1,500. Most common residential solar array size in Dubai.

3

Commercial Rooftop (100+ panels)

Quoted per panel or per linear meter after detailed site survey.

4

Annual Inspection Service

AED 150–300/year to check mesh integrity after Dubai sandstorm seasons.
